# Signature Communications

**Signature Industries Ltd**, established since 1993 and currently employing 120 people between our principal offices in Thamesmead, London and our Scottish offices in Glasgow, Edinburgh, Aberdeen and Grangemouth offer a comprehensive choice of products.

Our **London site** manufactures a wide range of Mobile Data, Search and Rescue Location Equipment, Electronic Audible and Visual Signalling Equipment with exports to over 30 countries worldwide.

**Signature's wireless division**, Signature Communications, specialises in communication solutions to organisations ranging from the Sale and Hire of Two-Way Radio products to the Design of Integrated Trunked / Cellular Vehicle Tracking systems.

## Customers benefit from our wealth of experience and qualifications including:

- 30 years experience in radio communications
- One of the largest distributors of communication equipment in the UK.
- Authorised Partners for the Sales and Service of all major Two-Way Radio Communication manufacturers including Motorola, Kenwood, Icom and Tait.
- Authorised Partners for Tracking Systems for Cybit and APD.
- Approved by Ofcom to supply and install Radio Systems.
- BS EN 9001:2000 Quality Management compliant.
- Suppliers to a variety of industries including NHS, MOD, Shipbuilding, Automotive, Local Government, Petrochemical Industries and Commerce.

## Signature Communications provide the following services:

### SALES

*Our wide product range includes:*

- Conventional Radio Systems for the majority of radio users
- Trunked Radio Systems for large scale users such as Local Authorities.
- Intrinsically Safe Radio equipment for use in the Petrochemical and Pharmaceutical industries and Hazardous Environments.
- Licence Free Radio Systems PMR446 for use in light commercial applications
- An extensive range of accessory products are available including microphones, earpieces, batteries and carry cases, to ensure you maximise the potential of your radio investment.
- Lone Worker and Emergency Functions can be provided to assist employers in complying with the new Health & Safety Duty Of Care Legislation.

*Atex and Cenelec Products suitable for Petrochemical plants and Hazardous Environments.*

## PROJECT MANAGEMENT AND SYSTEM DESIGN

Signature can help those users who need to unload the responsibility of implementing and overseeing a new system that involves licensing and the integration of bespoke products and services to form their chosen solution.

## HIRE

Our Hire Department provides reliable Two-Way Radio communications at short notice, offering a "next day" delivery and replacement service throughout the UK.

*The range of Hire products includes:*

- The Motorola GP300, GP340 and small GP344 radios along with Kenwood TK360 and compact TK3160 for conventional usage like Retail, Events, Leisure and Security.
- The GP640, GP680 radios for Trunked Radio usage by Local Authorities / Large Organisations.
- The GP900 Cenelec range for use in hazardous environments for example Petrochemical and Pharmaceutical industries.
- Accessories to match our Hire Products include Professional Ear Pieces, Lightweight Headsets, Heavy Duty Headsets, Covert Two Wire Kits for discreet applications and Lapel Remote Microphones.

For total peace of mind Signature maintains any equipment hired and provides continuing support by our highly efficient and experienced Communication Engineers.

## SERVICE

*Our Service Department offers the following support.*

## SYSTEM SOLUTIONS

The Service Department with our fully qualified and accredited engineers, has many years experience working in the Communications and Electronic industries, this ensures that they are fully competent to implement, install and maintain programs of all grades of communications systems.

*Trunked Radio Systems suitable for Local Authorities and Large Organisations.*

## AFTER SALES SERVICE

Our friendly and helpful Field Service and Workshop Engineers are fully equipped with the very latest test and measurement equipment, trained to install, repair, maintain and keep your system in continuous operation. All equipment supplied by Signature carries a 12 month warranty. For customers who require a more comprehensive service for their radio equipment needs, we can offer a range of Maintenance Contracts specifically tailored to individual customers requirements.

This ranges from a simple Extended Warranty Package, for a period of 2 – 5 years, to a more comprehensive solution, culminating in our 24 hour, 365 days per year Call Out option.

## MOBILE DATA

Signature Mobile Data products and services meet the demands of today's organisations and business users by improving the management of their personnel and assets in the field by offering the following products:

- Two-Way data
- Remote location and tracking via GPS
- Remote monitoring and control (Telemetry)
- Technology integration.
- Wireless broadband (CCTV & VOIP)
- Internet based platforms
- Real time operation

The benefits of these products and services can usually be achieved with a rapid return on investment.
